Installation manual

Please, read our instructions before installing and using the product.
Unpack the lamp upon receiving it. If you keep the lamp in the original packing for a prolonged period, the lamp surface might be affected. If you have any problems with the electrical installation, contact an electrician. Be sure to turn off the power before you start the installation. In some countries, all electrical installations must be carried out by professional electricians only. For further information, contact the relevant authorities.

Our products are for indoor use only. Check on a regular basis that the cord and other parts are not damaged. In this case, the product must not be used. Save these instructions for future use.

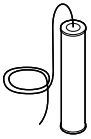

We use LED as a light source for our products. For replacement of the LED, contact Anour. The product should not be dismantled as it may get damaged. The product should not come into direct contact with water. We do not supply a power cable from the outlet to the power supply. The lamp must be connected to the wall switch. This wall switch should be used on a regular basis to ensure the proper functionality of the lamp and driver longevity.

Stone shades used for this lamp are handmade from natural stone. There are some variations in size, color and texture of the stone.

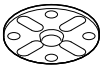

Our products are marked with the symbol of the crossed out wheelie bin. That means that the product should not be disposed of with other household waste. Our products must be recycled in accordance with local environmental regulations for the disposal of waste. In complying with this you will help to minimize any adverse effect on human and environmental health.

If you have any questions, please contact Anour at contact@anour.dk

POSSIBLE DALI INSTALLATION

CONVERTER NOT PROVIDED BY ANOUR

Lamp installation

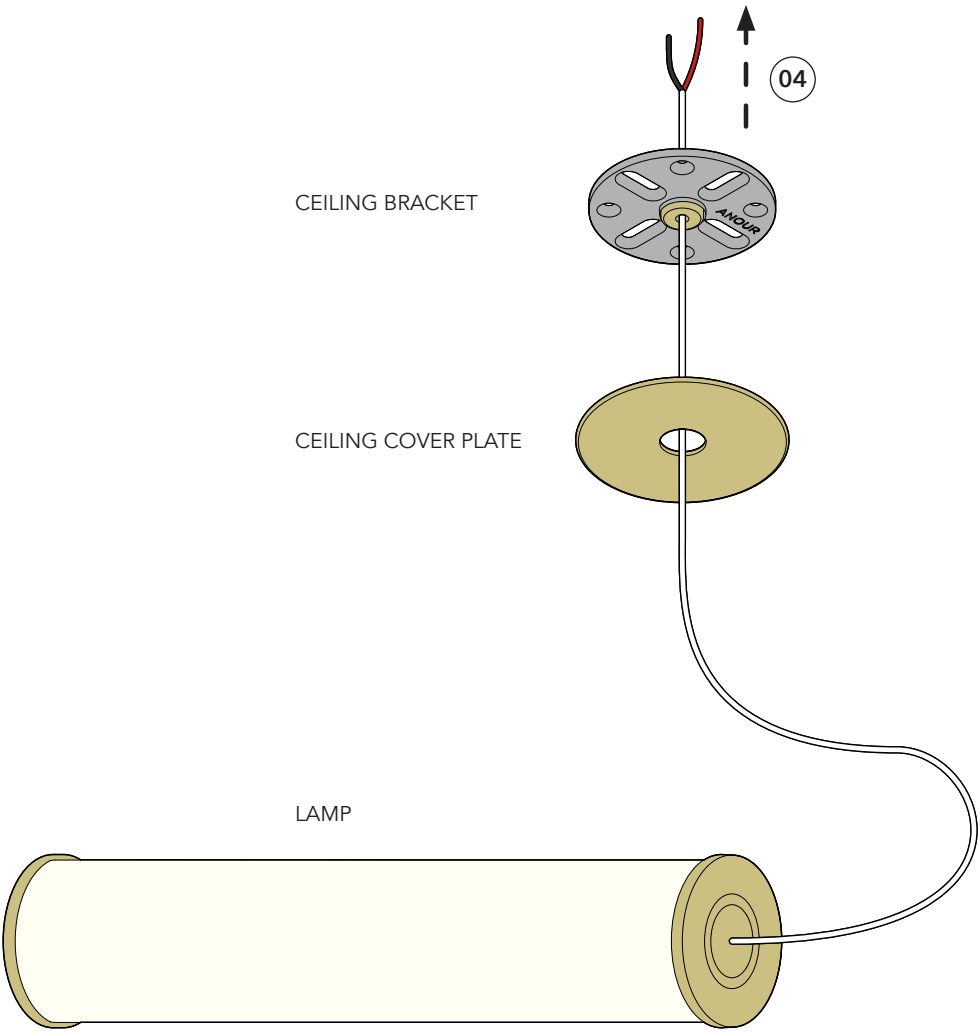

Turn off the main power.

1. Make a Ø50mm opening into your dropped ceiling.

2. Connect the driver + junction box to the 230V. We dont provide cord for this connection.

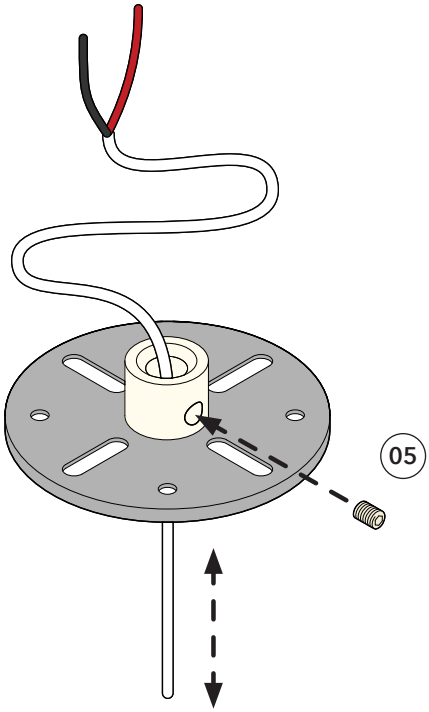

3. Move the driver and junction box inside of the dropped ceiling cavity.

Install the driver and junction box in a well-ventilated ceiling cavity; do not cover with insulation or place in sealed voids, and maintain clearance for heat dissipation. Do not exceed Ta 45°C. The driver must remain accessible and only the specified driver shall be used.

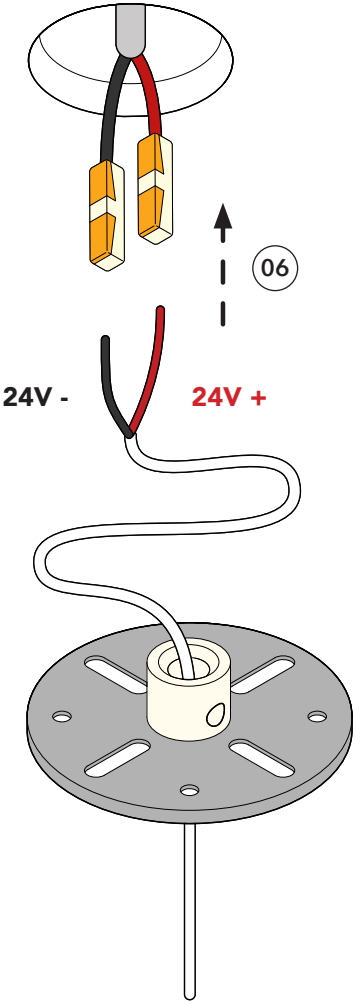

Always use gloves when handling the lamp

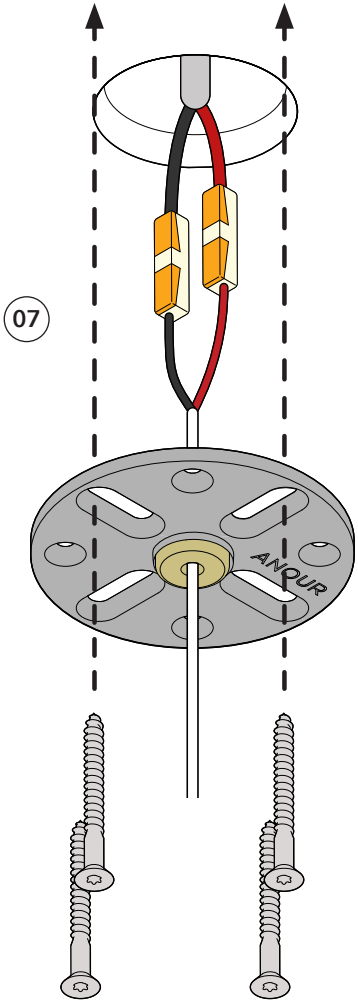

4. Pull the lamp cord thru the ceiling cover plate and ceiling bracket. Mind the orientation of the parts as shown on the picture.

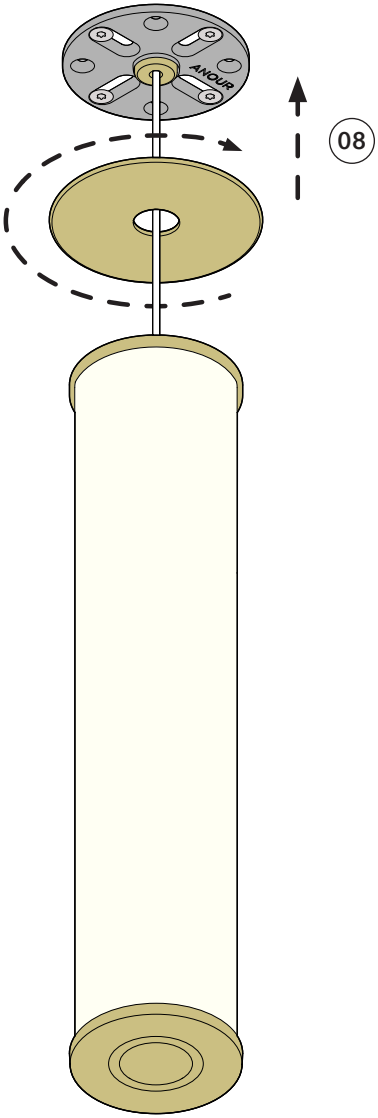

5. Set the lamp height and secure the cord with plastic set screw.

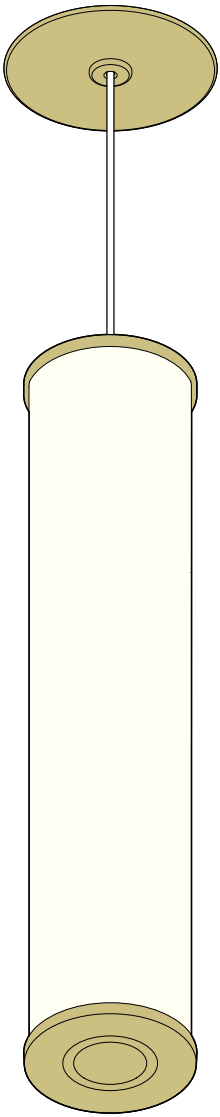

6. Connect the lamp to the driver. Mind the wire polarity.

07. Install the ceiling bracket with provided screws. If needed, use wall plugs.

8. Push the ceiling cover plate up to the bracket and fixate it by turning it all the way clockwise.

ANOUR

Thank you for choosing ANOUR lamp. Each piece is crafted to age with character and to quietly light your everyday rituals.

For questions, adjustments or spare parts, our team is ready to assist you at anour.dk or contact@anour.dk.
